

I can use LaTeX

My toc I

- 1 This create a section page

This create a section page

This create a slide

- First element
- Second element

Another slide Some text in my slide! Yay!

TinyTex It's convenient because it is easy to use, but it does not offer all the functionalities of LATEX

Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see <https://quarto.org>.

Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
[1] 2
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).
